

1U Open Brush Strip Panel Black

CMB-BS10S

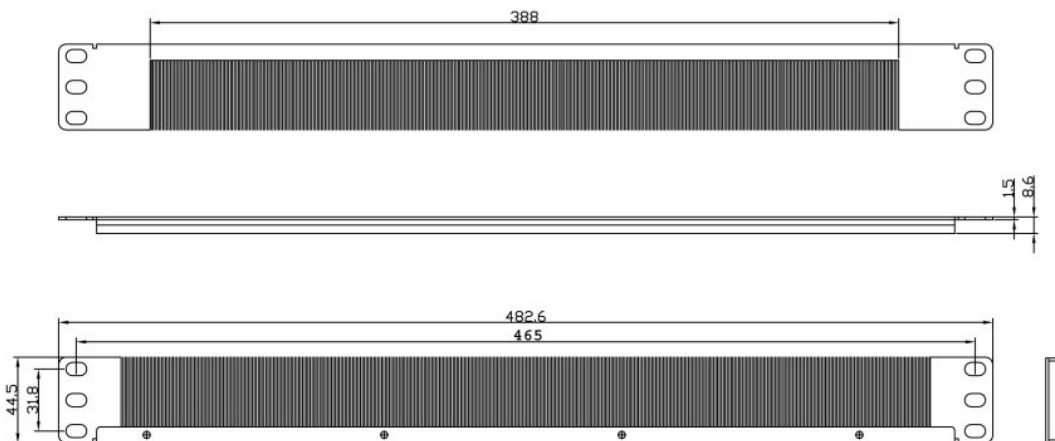

Description:

The 1U Open Brush Strip Panel is a simple yet highly effective solution for cable management in 19-inch rackmount cabinets. Designed with a dense brush insert, this panel allows cables to pass through cleanly while minimising air leakage — helping maintain internal airflow and thermal efficiency within the enclosure.

Manufactured from durable, powder-coated steel, the panel blends strength with a sleek, professional appearance. The black finish complements most rack systems, offering a neat and consistent look when installed.

SPECIFICATION	DETAILS
Colour	Black
Height	1U (44.5mm)
Width	19-inch rackmount (482.6mm)
Material	Powder-coated Steel
Compliance	RoHS Compliant

The brush strip serves two key purposes:

- Cable Routing: Enables patch cords, fibre, and power leads to be passed through rack spaces without tangling or hanging loosely.
- Airflow Containment: Helps to reduce bypass airflow by blocking open rack units, assisting with maintaining a controlled thermal environment in high-density installations.

This panel is ideal for data centres, server rooms, AV installations, or any environment where structured cable routing and airflow management are critical.
