

RACK SOLUTIONS

from Tripp Lite

Tripp Lite racks provide secure housing and organisation for up to 58U of rack-mount equipment—servers, routers, UPS systems, switches, audio/video—regardless of vendor. The sturdy steel frames are safe homes for the indispensable devices that keep business running.

In addition to compatibility with equipment, Tripp Lite's wide range of features ensures there is a solution for every application, from a cramped back room to a data centre.

FLOOR-STANDING RACKS

Enclosures

Organise and secure networking, storage and telecom equipment in data centres and server rooms. A wide range of heights, widths and depths support diverse applications. Installation is simple with quick-adjusting rails, locking doors, modular side panels and toolless mounting slots.

WALL-MOUNT RACKS

Enclosures

Designed to be attached to a wall, these smaller yet equally tough cabinets save floor space in areas that cannot accommodate floor-standing enclosures. Select models feature a hinged wall bracket to allow the rack to swing away from the wall for easy access to equipment and cables.

Open Frames

Open frame racks consist of mounting rails without sides or doors, typically used in applications that do not require rack-level physical security and do not need airflow control. The open design facilitates cable routing and access for networking applications, with ample space for organisation and mounting.

Open Frames

Built for applications that do not require physical security, open frame wall-mounts provide excellent airflow and easy access to wiring in small but secure locations.

Expandable models adjust to specific needs and come in a variety of depths to fit any space.

Special Features Include

PCI Compliance

Shock-Pallet Packaging

Expansion Models

Co-Location

Clear Acrylic Doors

Extra Width

Extra Depth

Seismic Protection

Sound Suppression

PLUS

New SmartRack® heavy-duty shipping cases transport up to 10U of rack-mount equipment to trade shows, concert venues or other locations. Available from 2U to 10U with rugged ABS construction to withstand the rigours of travel.
