

FOR HOME-WORKING & OFFICES, 'SEE CABLES, THINK D-LINE'...

Cable Tidy Units

3x entry/exit slots

Personal office setups, at home or company, typically depend on around twenty-foot of cables to power the equipment and devices we need to do our jobs.

Then we complain when cables go 'missing', look out-of-place or seem almost impossible to clean around. But it doesn't have to be that way, with friendly cable organisers readily available...

D-Line's made-in-UK 'easy-to-use, look great!' cable management products require no electrical competence, as most can be retro-fitted around existing cables.

Cable Tidy Units hide socket blocks and cable clutter. Popular on floors and desktops, cables go in or out via rear exits. The Units combine style, safety & robustness in a practical design. When in the Cable Tidy Unit, extension sockets and plugs become less accessible; wasted space is returned; cleaning is easier; and the cables remain where you need them to be and less likely to be 'borrowed!' by others.

D-Line **Cable Tube's** are flexible and pre-split to welcome cables dropping behind a desk. Users simply push in (or pull out) cables via the split-seam – different to expandable **Spiral Wraps** which can be wrapped around cable bundles up to 40mm diameter. D-Line **Cable Zipper** works best for encapsulating several cables that are over two metres long.

For underside a desktop or up a desk leg, D-Line **CableTraC's** are peel & stick lengths with a pliable top section that allows cables to enter or exit at any point. The modern ½-round shape is gentle on impact, easy to clean, and non-metallic so lengths are easy to cut if needed.

Around the desk, Cable Tidy **Clips**, and **Bases**, are peel & stick solutions for keeping cables where you want - so eliminating wasted time. And hook & loop **Band** is ideal for sorting loose cables, keeping them close, while being reusable and multi-purpose!

Wherever we work, be it at home or an office, with a D-Line solution for every scenario, cable management has never been easier...
